

GAITSCAN™

designed to benefit your practice.

TICK THE BOXES THAT BEST DESCRIBES YOU:

I have objective measures for diagnosing lower limb and foot pathologies

When new methods or technology is released I usually wait to see how others go first

I am a leader in my industry

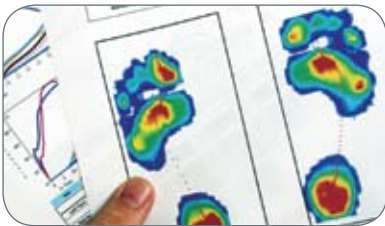

FEATURES

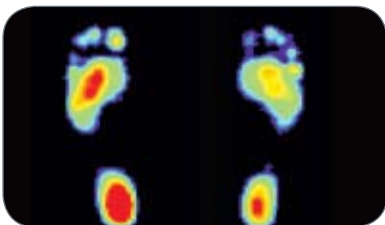

Extreme Versatility. To accurately graph foot pressures during walking and running phases.

Comparison Capability. Compare your patient's scan to an optimal scan or another scan in your database. This enables the patient to understand how their foot biomechanics compare to mechanics of an optimal foot.

Patient Reports. Provide your patients with objective printouts of their assessment.

Bilateral Pressure Distribution Scale.

Our static display captures bilateral pressure distribution: useful in both pre and post treatment and for detecting leg length discrepancies.

A Powerful Partnership. A full range of superior orthotics, quality footwear and a complete customer support system helping you increase orthotic prescription accuracy and patient outcomes.

If you want to advance your clinic, don't procrastinate!! Act now instead of giving your competition the first chance at taking the competitive edge with Gaitscan™. AOG knows how to assist you in taking your practice to the next level.

Don't be a follower forever, give your patients the best possible outcomes you could give them... right now!

The first 50 callers to contact an AOG business solutions representative for a demonstration of Gaitscan will receive their own Custom orthotics.
